Introducing “OrderFlow IQ”

OrderFlow IQ is an all-in-one order-flow and volume-profiling suite crafted to bring true market microstructure to your TradingView charts. It bundles footprints, per-bar and intra-bar delta analytics, class-based delta tracking, adaptive volume profiles, bubble-style trade tapes, live time-and-sales feeds, cumulative-volume fight meters, iceberg detection, and more—all driven by a single, user-friendly interface.

Features

The list below details an ever=expanding list of the indicators capabilities; more to come in the future!

- Tick-based Footprints
- Imbalance and stacked imbalance detection
- Tick-based chronicled volume profile
- Delta classification (small order, medium order, and block order delta)
- Tick-based order flow bubble tape
- Live order feed with total buying volume against total selling volume
- Tick-based CVD
- Iceberg order detection
- Delta class lines
- Tick-based bar statistics
